## INTEGRATED PEST MANAGEMENT POLICY

The Southeast Delco School District (SESDS) Facilities use Integrated Pest Management to alleviate pest problems with the least possible hazard to people, property, and the environment. IPM emphasizes nonchemical strategies such as sanitation and exclusion to achieve long-term solutions.

Pesticides are to be used in SESDS facilities as a last resort after non chemical strategies have been exhausted only by certified commercial applicators and only after consideration of the full range of alternatives, based on analysis of environmental effects, safety, effectiveness, and costs. Staff is not permitted in any area where a pesticide has been applied to exposed surfaces for a minimum of seven hours. SESDS will maintain a limited list of approved pesticides for use when required. Products will be selected after careful consideration of hazards. The list will be reviewed annually by the IPM Coordinator and Safety Committee.

When pesticide applications are scheduled for the SESDS managed buildings and grounds, SESDS shall provide notification including:

1. Posting a pest control information sign with the date, time and location of the application and the product applied in an appropriate area and including contact information for additional details. Information must be made available on potential adverse effects of pesticides, derived from Safety Data Sheets (SDS), pesticide product labels, EPA, and other sources.

**Notice: Termiticide/Insecticide will be applied in and around the Gym at Academy Park High School beginning on Monday April 11, 2022 and will be completed by Tuesday, April 13, 2022.**

2. Providing this information to all individuals working in the building.

**Safety Data Sheets will be available for review in the front office beginning April 11, 2022**

3. Providing this information to all staff, students, parents and guardians who have requested notification of individual applications of pesticides

**As of April 8, 2022, no staff, parents and or guardians have requested to be notified when applications of pesticides are made.**

Where pests pose an immediate threat to the health and safety patients, visitors, or employees, SESDS may authorize an emergency pesticide application and shall notify by telephone any guardian who has requested such notification. Disinfectants, antimicrobials and self-contained or gel-type pesticide baits applied in inaccessible areas are exempt from posting, notification and the 7-hour reentry requirement.
